Mike –

Mail is good. CD rom is good. If the CD rom includes an electronic copy of everything, that would be good.

You can send it here:

Shaun McGrath, Administrator

EPA Region 8

1595 Wynkoop Street

Denver, CO 80202-1129

I don't know what to tell you about copies. If you send one complete set to the RA, it will get routed down here (probably to Tonya). You could send a second set to me using the same address above 'cept with my name (or one package to the RA with 2 sets included, if you'd rather), and a 3rd set to Tina at the Helena address. Usually there is a little cover letter saying here it is, please approve our changes. You could look at an example from a previous submission.

I'm copying Tina on this email so she can correct me if I said something wrong.

thanks

Dave

Hi Dave;

A couple questions more on the submittal. We plan to send it by mail, primary because we have the big pile of technical support documents on a CD rom and don't want to crash peoples computers by emailing. If you would prefer that we transfer everything to you via an ftp site however, we are fine with that too, just let me know the site and access codes.

Assuming we will be snail-mailing,

1. What is the correct ground address?
2. How many copies of the package do you want and to whom will they be addressed? I assume you or Tonya (or both) and Tina? Others?

Thanks, Mike

The submission requirements are discussed in the EPA rule at 131.6. A redline strikeout version of the WQS is always appreciated, and it is required to include a certification from the State Attorney General that the water quality standards were adopted in accordance with state law. Supporting documents can be in electronic form. Typically, the packages are sent to the R.A., but if Montana has historically not done it that way, then I would suggest following the past practice. Does that help?

Congratulations on getting the standards adopted. It was very well done and we really appreciate all of the communication with EPA along the way.

Subject: Procedure for submitting nutrient standards package

Hi Dave, Tina and Tonya;

I wanted to ask about the procedure for providing our recently-adopted nutrient standards and variance process to EPA for EPA review. As you know, we have a compilation of technical work, testimony, etc. etc.

Thanks, Mike
